

ecoTicket

Electronic ticketing
system

ecoTicket is a Fare Management System covering pricing policy management, electronic ticket generation and validation, ticket printing, track management and monitoring, revenue management and reporting.

Its main goal is to create a fast and convenient way for passengers to pay for fares. Furthermore it offers a quick overview for the operator over the passenger flow and ticket sales.

Sales channels include on-board (usually only for single tickets), at vending machines or retail shops.

the scope

- ✓ Bus fleet management (tracks & routes)
- ✓ Subscriptions management
- ✓ Ticket printing and validation
- ✓ Easy reporting

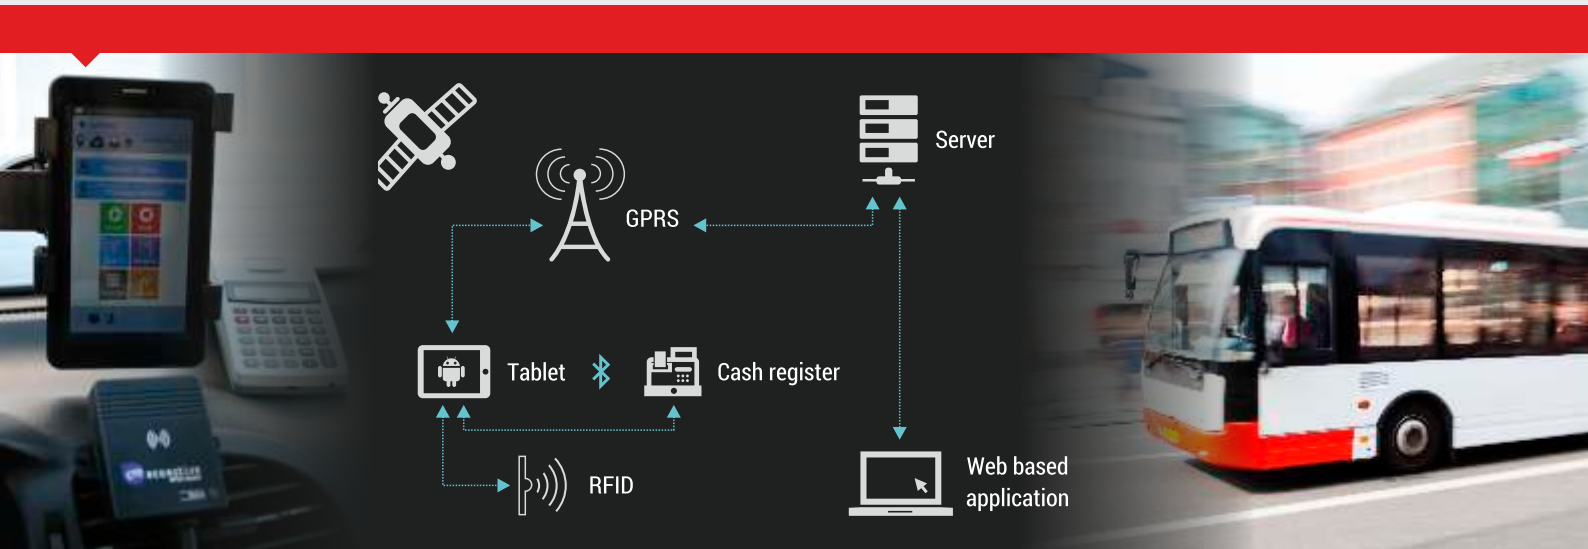

your gain

- ✓ Easy control of the issued tickets
- ✓ Quick verification of subscription status
- ✓ Quick generation of track reviews
- ✓ Real-time checking of the fleet on your mobile phone and or desktop PC

TOP features

- 1 Web based back-office
- 2 Android application for the BUS driver
- 3 Easy management of the bus fleet (tracks & routes)
- 4 Fare management
- 5 Management of subscribers and subscriptions
- 6 e-ticket management and validation
- 7 Ticket printing and validation
- 8 Online reporting
- 9 Integration with 3rd party software

- ✓ The Bus driver can easily issue tickets, with predefined fares using the android touchscreen device.
- ✓ Tickets are automatically printed by the touch of a button, through the onboard cash register.
- ✓ The system provides an RFID smart card reader, enabling the handling of subscriptions and passes, allowing the operator to easily apply different discounts (student, elderly etc.).
- ✓ All information is stored also on the device, so the driver has online reports of his daily activity.
- ✓ The onboard device is constantly connected to the main server through GPRS, so the headquarters operator has an online view of the current situation of every single vehicle: location, number of daily passengers, current number of passengers, number of tickets issued and whether timetables are met or not.
- ✓ You can easily manage fares, timetables, discounts, vehicles, routes and have comprehensive reports about these and combination of these items.
