

Tacho2Safe

Manual tachograph
download device

Tacho2Safe is a new generation of manual tachograph download device which combines both tachograph and drivercard download functionality.

It is a simple use, ergonomic device, suitable for use either by owner drivers, small fleets or large transport operations.

Download data is stored on the internal 1GB memory of Tacho2Safe.

The reduced power consumption allows over 500 full card downloads with only one AA type battery but it can be operated from rechargeable batteries which are charged automatically through USB.

You can benefit from the very powerful download reminder functionality of Tacho2Safe and increased download speed compared to other devices.

TOP features
